

## Specific Treatments

**The following injuries may merit immediate transport.**

**Bleeding:** Direct pressure, elevate, and tourniquet if the first two actions fail to control extremity bleeding.

**Shock:** Lay patient down, elevate feet, and keep warm.

**Fractures:** Splint joints above and below injury. Monitor pulse and sensation before and after splinting the limb.

**Head Injury:** Stabilize patient's head and neck, maintain airway.

**Bee Sting** (or other allergic reaction with rash, face, or airway swelling, difficulty talking/breathing): If the patient has an epi kit, assist them in using the medication.

**Burns:** Remove heat source, cool with water, dry wrap, and give fluids if conscious.

**Eye Injuries:** Wash out foreign material. Don't open swollen eyes. Bandage impaled objects in place, and bandage both eyes if possible.

**Heat Stroke:** Cool body as quickly as possible. See page 112 for additional information.
